FULLSTACK WEB DEVELOPER

Hello, I'm
Sophia Derugen-Toomey.

I am a philosopher turned programmer bringing a love of rigor and creativity to the problems of web development.

Experience

2018–2022

Wayfair in Boston, MA
2018 - SOFTWARE ENGINEER I
2019 - SOFTWARE ENGINEER II

- Lead a major refactoring of Wayfair's customer service text communication routing backend into a GraphQL / Node.js microservice with new MSSQL database from PHP monolith code.
- Built and maintained Wayfair's live chat service with a Node.js / GraphQL backend and React / Redux /Apollo frontend, supporting its growth from the original 30 person pilot to Wayfair's first international launch of 3000 customer service agents.
- Built various tools for skilling and observing metrics on customer service agents, such as a dashboard of live metrics for all customer service agents, as well as other frontend tools as needed using React / Redux.
- Passed company certification to review Javascript both internally and externally.
- Acted as scrum master and communicated granular projections of project timelines to team leadership.

2017–2018

General Assembly in Boston, MA
WEB DEVELOPMENT IMMERSIVE STUDENT

- Successfully completed accelerated 600+ hour program.
- Designed and created four projects, each completed within a five day time period.
- Presented said projects to groups of peer developers.
